Dear HHS,

I am wrting to ask you to reconsider your mandate that contraceptives must be covered as preventive health servioces by all health insurance plans. This is a serious error when termed as preventive, because contraceptives destroy human life and pose serious threat to the women who use them The threats are in the form of cancer, stroke, miscarriage. damage to the woman's reproductive physiology and potential emotional distress. How can those risks be called preventive? I ask that you allow insurance companies to opt out of covering contraceptives so that they do not become complcit in injuring womens' health. With Breast Cancer so high in this country,it is hard for me to understand why we must pay for the further promotion of this disease through contracpetive use. Contraceptives are a Class 1 carcinogen and should not be forced on the American People.

Sincerely,

Diana M. L.Newman,EdD RN
